

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

All through their journey, John reacquainted himself with past business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable marketplace for a product that could promptly and securely elevate individuals in the air to accomplish upkeep and other building services.

Upon returning from their travels, John established a joint venture with two friends and acquired a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The company incorporates many of the simple design elements of that original lift into current designs.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the company proudly continues to expand itself into various marketplaces worldwide and develops new products to make certain consumers are capable of being more effective and perform in the workplace within a safer environment.
